PROFILE

Information Science & Engineering graduate with hands-on experience in process improvement, business operations and digital systems; working knowledge of Excel, SQL, Python and Power BI.

SKILLS

Business & Operations: Process mapping, requirements clarification, workflow improvement, SOP/playbook design, stakeholder coordination, inventory/logistics, Shopify operations
Data: Excel, Google Sheets, SQL/MySQL, Power BI, Python
Technical: Git/GitHub, Flask, scikit-learn, QA/test design, AI-assisted development

EXPERIENCE

Hiland Realty Jan 2026 - Sep 2026

Business Operations & Digital Marketing

- Built a 42-page sales playbook covering project information, customer profiles, calls, follow-ups and site-visit preparation.
- Mapped the enquiry-to-site-visit workflow and improved call goals, WhatsApp follow-ups, next actions and scheduling.
- Defined requirements and QA for a 40-page website rebuild covering navigation, lead forms, mobile behavior and SEO.

Posterwa Sep 2023 - Present

Business Operations & Digital Commerce | Internship → part-time → freelance

- Managed venue bookings, stall setup, stock transport and inventory for school and college activations.
- Coordinated about 40–50 people across separate engagements; supported Shopify product operations and a stock-holding pilot.

SELECTED PROJECTS

ContextVault | Chrome Extension

- Defined the product workflow and led AI-assisted development of a local-first AI context-transfer tool; stable-core QA passed 35/35 automated gates.

LibreSEO | Automated SEO Audits

- Directed an SEO audit workflow covering technical, content and accessibility checks; final source QA passed 186/186 tests with 86% line coverage.

Loan Approval Prediction | Technofly Solutions Data Science Course

- Compared six classifiers on 614 records; Logistic Regression reached about 84% hold-out accuracy.
